COMMUNICATION

SKILLS

RATIONALE

The wide range of communicative and functional need of English in the evolving global and technical professional environment has more than ever imposed a demand of acquiring proficiency in communication skills in our technicians and diploma pass outs. Besides being a professional language, it also acts as a window to technical and scientific knowledge. Diploma pass outs are required to communicate with personnel belonging to different echelons of authority. Therefore, acquiring proficiency in listening, speaking, reading and writing English is an integral part of professional and technical competence.

Upon completion of this course, the student will be able to: Understand slowly delivered spoken material in Indian English. Understand general purpose words of English.

Use general purpose words of English to express himself in speaking reasonably clearly and correctly on routine matters.

Write reasonably and grammatically correct English.

Develop a habit of reading with comprehension to achieve an optimum speed of 75 WPM. Communicate effectively in a professional environment through speaking and writing to achieve desired objectives.

RATIONALE

Mathematics forms backbone for all technologies and hence occupies an important place in the curriculum of polytechnic education. The subject is equally important for the future self development of Polytechnic students. In designing the curriculum for foundation course the admission level to Polytechnics has been considered as 10th Board examination and mathematical needs of Technical subject have been given due consideration. To understand difficult concepts in higher engineering courses and to solve many problems of design and development a good background in mathematics is necessary. In view of this course is required for engineering diploma programmes.
