

BHABHA UNIVERSITY, BHOPAL

Scheme of Examination

Third Semester- Bachelor of Technology (Electrical and Electronics Engineering) Session 2019-20

SPECIALIZATION – Electrical & Electronics Engineering

S.No.	Subject Code	Subject Name	Periods per week			Credits	Maximum Marks (Theory Slot)			Maximum Marks (Practical Slot)		Total Marks
			L	T	P		End Sem. Exam.	Tests (Two)	Assignments /Quiz	End Sem. Practical /Viva	Practical Record/ assignment/Quiz /Presentation	
1	CH-31	Energy & Environmental Engineering	3	1	-	4	70	20	10	-	-	100
2	EX-31	Analog Electronics	3	-	2	4	70	20	10	30	20	150
3	EX-32	Signals & Systems	3	1	-	4	70	20	10	-	-	100
4	EX-33	Network Analysis	3	-	2	4	70	20	10	30	20	150
5	EX-34	Electrical Measurement & Measuring Instruments	3	-	2	4	70	20	10	30	20	150
6	EX-35	Computer Programming – I (Python)	-	-	4	2	-	-	-	30	20	50
7	EX-36	Skill Development	-	-	4	2	-	-	-	-	50	50
		Total	15	2	14	24	350	100	50	120	130	750

Theory Credits : 17
 Practical Credits : 07
 Total Credits : 24

Theory Marks : 350
 Practical Marks : 150
 Quiz, Mid Term, Lab. Work : 250

Total : 750

BHABHA UNIVERSITY, BHOPAL

COURSE CURRICULUM FACULTY OF ENGINEERING

Undergraduate Programme

(Courses effective from Academic Year 2019-20)

SYLLABUS OF COURSES TO BE OFFERED “Bachelor of Technology”

Disclaimer: The postgraduate programme in Bachelor of Technology syllabus & schemes is uploaded as given by the Faculty concerned to the Academic Council. The same has been approved as it is by the Academic Council on 02.07.2018.

Dean faculty of Engineering, Bhabha University

NH-12, Jatkhedi, Hoshangabad Road, Bhopal (M.P.) – 462 026

Visit us at: www.bhabhauniversity.edu.in, Mail Id info@bhabhauniversity.edu.in

The logo of Bhabha University Bhopal is a shield-shaped emblem. It features a central gear with a stylized atomic symbol inside. Below the gear is an open book. The shield is surrounded by a purple banner with the university's name. The text is centered over the logo.

Bachelor of Technology
III
Semester
Electrical & Electronics Engineering
(EEE)

Bachelor of Technology
Branch – Electrical & Electronics Engineering

CH-31 Energy & Environmental Engineering

UNIT-I

Introduction to Energy Science: Introduction to energy systems and resources; Introduction to Energy, sustainability • & the environment; Overview of energy systems, sources, transformations, efficiency, and storage; Fossil fuels (coal, oil, oil-bearing shale and sands, coal gasification) - past, present & future, Remedies & alternatives for fossil fuels - biomass, wind, solar, nuclear, wave, tidal and hydrogen; Sustainability and environmental trade-offs of different energy systems; possibilities for energy storage or regeneration (Ex. Pumped storage hydro power projects, superconductor-based energy storages, high efficiency batteries)

UNIT-II

Biodiversity and its conservation • Introduction – Definition: genetic, species and ecosystem diversity; Bio-geographical classification of India; Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values; Biodiversity at global, National and local levels; India as a mega-diversity nation; Hot-spots of biodiversity; Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts; Endangered and endemic species of India; Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity

UNIT-III

Ecosystems • Concept of an ecosystem; Structure and function of an ecosystem; Producers, consumers and decomposers; Energy flow in the ecosystem; Ecological succession; Food chains, food webs and ecological pyramids; Introduction, types, characteristic features, structure and function of the following ecosystem (a.) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

UNIT-IV

Social Issues and the Environment • From Unsustainable to Sustainable development; Urban problems related to energy; Water conservation, rain water harvesting, watershed management; Resettlement and rehabilitation of people; its problems and concerns. Case Studies Environmental ethics: Issues and possible solutions. Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case Studies Wasteland reclamation; Consumerism and waste products; Environment Protection Act; Air (Prevention and Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act; Issues involved in enforcement of environmental legislation; Public awareness.

UNIT-V

Environmental Pollution Definition, Cause, effects and control measures of Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, Nuclear hazards; Solid waste Management: Causes, effects and control measures of urban and industrial wastes; Role of an individual in prevention of pollution; Pollution case studies; Disaster management: floods, earthquake, cyclone and landslides. Field work • Visit to a local area to document environmental assets river/forest/grassland/hill/mountain • Visit to a local polluted site- Urban/Rural/Industrial/Agricultural • Study of common plants, insects, birds. • Study of simple ecosystems-pond, river, hill slopes, etc

Bachelor of Technology
Branch – Electrical & Electronics Engineering

EX-31 ANALOG ELECTRONICS

UNIT-I

Transistors: BJT, types & configuration, working principle, characteristics, and region of operation, load line, biasing methods, Small signal analysis of transistor (low frequency) using h-parameters, thermal runaway and thermal stability. FET MOSFET, Transistor as an amplifier, gain, bandwidth, frequency response

UNIT-II

Semiconductor Diodes: Theory of P-N junction, temperature dependence and break down characteristics, junction capacitances, Zener diode, Varactor diode Tunnel diode, PIN diode, LED, Photo diode, Schottky diode, Diode applications series –parallel configurations, full wave and half wave rectification, voltage multiplier circuits, diode testing

UNIT-III

Operational Amplifier: Operational amplifier basics, practical Op-amp circuits & characteristics, slew rate, bandwidth, offset voltage, basic current, application, inverting, non inverting amplifier, summer, average differentiator, integrator, differential amplifier, instrumentation amplifier, log and antilog amplifier, voltage to current and current to voltage converters, comparators Schmitt trigger, active filters, 555 timer and its application

UNIT-IV

Feedback amplifier and Oscillators: Feedback amplifier, negative feedback voltage-series, voltage shunt, current series and current shunt feedback, Sinusoidal oscillators, L-C (Hartley-Colpitts) oscillators, RC phase shift, Wien bridge, and Crystal oscillators. Power amplifiers, class A, class B, class AB, class C amplifiers, their efficiency and power Dissipation, Push-pull and complementary symmetry push-pull amplifier.

UNIT-V

Wave Shaping circuits: Switching characteristics of diode and transistor, turn ON, OFF time, reverse recovery time, transistor as switch, Multivibrators, Bistable Monostable, Astable multivibrators. Clipper and clamper circuit, Differential amplifier, calculation of differential, common mode gain and CMRR using h-parameters, Darlington pair, Boot strapping technique. Cascade and cascade amplifier.

Bachelor of Technology
Branch – Electrical & Electronics Engineering

List of Experiment:-

1. Design & measure the frequency response of an RC coupled amplifier using discrete components.
2. Design a two stage RC coupled amplifier and determine the effect of cascading on gain and bandwidth.
3. Study the effect of voltage series, current series, voltage shunt and current shunt feedback on amplifier using discrete components.
4. Design & realize inverting, non-inverting and buffer amplifier using 741 op-amps.
5. Verify the operation of a differentiator circuit using op amp IC 741 and show that it acts as a high pass filter.
6. Verify the operation of an integrator circuit using op amp 741 and show that it acts as a low pass filter.
7. Design & Verify the operation of adder and subtractor circuit using op amp 741.
8. Plot frequency response of AC coupled amplifier using op amp 741 and study the effect of negative feedback on the bandwidth and gain of the amplifier.
9. Study of IC 555 as astable and monostable multivibrator.
10. Design & realize using op amp 741, wein-bridge oscillator

.

Bachelor of Technology
Branch – Electrical & Electronics Engineering

EX-32 Signals & Systems

UNIT-I

Classification of signals and systems: Continuous time signals (CT signals) Discrete time signals (DT signals) - Step, ramp, pulse, impulse, sinusoidal and exponential signals, basic operations on signals, classifications of CT and DT signals- Periodic and aperiodic signals, energy and power signals, random signals CT systems and DT systems, basic properties of systems, basic properties of systems linear time invariant systems and properties

UNIT-II

Linear time invariant continuous time systems: Differential equations representation, block diagram representation, state variable representation and matrix representation of systems, impulse response, step response, frequency response reliability of systems, analog filters

UNIT-III

Analysis of continuous time signals: Time and frequency domain analysis, Fourier series analysis, spectrum of CT signals, Fourier transform and Laplace transform region of convergence, wavelet transform

UNIT-IV

Analysis of discrete time signals: Convolution sum and properties, sampling of CT signals and aliasing, DTFT and properties, Z transform and properties, inverse Z transform.

UNIT-V

Linear time invariant discrete time systems: Difference equations, block diagram representation, impulse response, analysis of DT LTI systems using DTFT and Z transform, state variable equations and matrix representation of systems, Digital filters

4. Simon Haykins and Barry Van Veen, Signals and Systems, Wiley India

Bachelor of Technology
Branch – Electrical & Electronics Engineering

EX-33 Network Analysis

UNIT-I

Introduction to circuit elements R,L,C and their characteristics in terms of linearity & time dependent nature, voltage & current sources controlled & uncontrolled sources KCL and KVL analysis, Nodal & mesh analysis, analysis of magnetically coupled circuits, Transient analysis, Transients in RL RC&RLC Circuits, initial conditions time constants. Steady state analysis- Concept of phasor & vector impedance & admittance.

UNIT-II

Network topology, concept of Network graph, Tree, Tree branch & link Incidence matrix, cut set and tie set matrices, dual networks, Dot convention coupling co-efficient, tuned circuits, Series & parallel resonance. Network Theorems for AC & DC circuits- Thevenins & Norton's, Superpositions, Reciprocity Compensation, Substitution, Maximum power transfer, and Millman's theorem Tellegen's theorem, problems with dependent & independent sources

UNIT-III

Network function & Two port networks – concept of complex frequency Network & Transfer functions for one port & two ports, poles and zeros, Necessary condition for driving point & transfer function. Two port parameters – Z, Y, ABCD Hybrid parameters, their inverse & image parameters, relationship between parameters Interconnection of two ports networks, terminated two port networks

UNIT-IV

Frequency domain analysis – Laplace transform solution of Integro-differential equations, transform of waveform synthesized with step ramp, Gate and sinusoidal functions, Initial & final value theorem, Network Theorems in transform domain

UNIT-V

Concept of signal spectra, Fourier series co-efficient of a periodic waveform symmetries as related to Fourier coefficients, Trigonometric & Exponential form of Fourier series

List of Experiment:-

1. To Verify Thevenin Theorem.
2. To Verify Superposition Theorem.
3. To Verify Reciprocity Theorem.
4. To Verify Maximum Power Transfer Theorem.
5. To Verify Millman's Theorem.

Bachelor of Technology
Branch – Electrical & Electronics Engineering

6. To Determine Open Circuit parameters of a Two Port Network and to Determine Short Circuit parameters of a Two Port Network.
7. To determine A, B, C, D parameters of a Two Port Network
8. To Determine h parameters of a Two Port Network
9. to Find Frequency Response of RLC Series Circuit.
10. To Find Frequency Response of RLC parallel Circuit.

Bachelor of Technology
Branch – Electrical & Electronics Engineering

EX-34 Electrical Measurement & Measuring Instruments

UNIT-I

Introduction, History and overview of measurement system, Fundamentals of Measurement system, Static and Dynamic Characteristics of measurement systems Systematic Characteristics, Generalized model, Transfer function, Techniques for dynamic compensation, Accuracy of measurement systems in steady state Measurement error, Error probability function, Error reduction techniques Reliability, Choice and Economics of measurement systems. Loading effects due to shunt connected and series connected instruments, calibration curve, Testing & calibration of instruments

UNIT-II

Galvanometers –Theory, principle of operation and construction of ballistic galvanometer, D'Arsonval galvanometer, Definition of analog & digital instruments Classification of analog instruments, their operating principle, Operating force Types of supports, Damping, Controlling. Different types of Ammeter & Voltmeter PMMC MI, Electrodynamometer, Induction, Expression for control & deflection torque their advantages, disadvantages & error, Extension of range of instruments using shunt & multiplier.

UNIT-III

Digital Voltmeter, Ammeter, Multimeter and Wattmeter. Instrument transformers Potential and current transformers, ratio and phase angle errors, testing of instrument transformers, Difference between CT and PT, errors and reduction of errors Measurement of power: Power in AC and DC Circuit, Electrodynamometer type of wattmeter, Construction, theory, operation & error, Low power factor & UPF wattmeter, Double element and three element dynamometer wattmeter, Measurement of power in three phase circuit, one, two & three wattmeter method, Measurement of reactive power by single wattmeter, Measurement of power using CTs & PTs

UNIT-IV

Measurement of Energy: Single phase and three phase digital / Electronic energy meter – construction & operation – Energy flow and power calculations, errors –Testing by phantom loading, Tri-vector meter, Maximum demand meter, Ampere hour meter. Power factor meter– Single phase and three phase Electro-dynamometer type & moving iron type. .

UNIT-V

Frequency meter Vibrating reed, Resonance type & Weston type, Synchronoscope, Ohmmeter – series & stunt type, Megger & Ratio meter. Resistance Measurement – Classification of low, medium & high resistance, Voltmeter Ammeter method, Wheatstone Bridge, Kelvin's double bridge & loss of charge methods for resistance measurement, Earth resistance measurement. Magnetic Measurement – B-H Curve, Hysteresis Loop determination, Power loss in sheet metal – Lloyd Fischer square for measurement of power loss.

Bachelor of Technology

Branch – Electrical & Electronics Engineering

List of Experiment:-

1. Measurement of low resistance using Kelvin's Double Bridge
2. Measurement of medium resistance using Wheatstone's bridge
3. Measurement of high resistance by loss of charge method
4. Measurement of Insulation resistance using Megger
5. Measurement of earth resistance by fall of potential method and verification by using earth tester
6. Measurement of power in a single phase ac circuit by 3 voltmeter/ 3 Ammeter method
7. Calibration of a dynamometer type of wattmeter with respect to a standard/Sub Standard wattmeter
8. Calibration of single phase digital/ Electronic type energy meter.
9. Calibration of a dynamometer type of wattmeter by Phantom Loading method.
10. Measurements using Instrument Transformers.
11. Study of various types of Indicating Instruments.
12. Measurement of Power in three phase circuit by one, two & three wattmeters.
