

Bhabha University, Bhopal (M.P.)

Scheme of Examination

Program: Bachelor of Technology
Semester : VI

Branch: Computer Science and Engineering
Specialization: Computer Science and Engineering

Session: 2020-21

S.No.	Subject Code	Subject Name	Maximum Marks Allotted					Total Marks	Contact Hours per week			Total Credits
			Theory			Practical			L	T	P	
			End Sem	Mid Sem Exam	Quiz/ Assignment	End Sem	Term work Lab Work & Sessional					
1.	CS-61	Machine Learning	70	20	10	30	20	150	3	1	2	5
2.	CS-62	Computer Network	70	20	10	30	20	150	3	1	2	5
3.	CS-63	Project Management	70	20	10	-	-	100	5	-	-	5
4.	CS-64	Internet of Things	70	20	10	30	20	150	3	1	2	5
5.	CS-65	Dot Net Lab	-	-	-	30	20	50	-	-	2	1
6.	CS-66	Minor Project II	-	-	-	-	100	100	-	-	4	2
7.	CS-67	Project Seminar	-	-	-	-	50	50	-	-	2	1
		Total	280	80	40	120	230	750	14	3	14	24

*End Semester Examination will be of three hours.

Practical Subject:

CS-61: Machine Learning
CS-64: Internet of Things
CS-66: Minor Project II

CS-62: Computer Network
CS-65: Dot Net Lab
CS-67: Project Seminar

1 Hr Lecture	1 Hr Tutorial	2 Hr Practical
1 Credit	1 Credit	1 Credit

BHABHA UNIVERSITY, BHOPAL

COURSE CURRICULUM FACULTY OF ENGINEERING

Undergraduate Programme

(Courses effective from Academic Year 2020-21)

SYLLABUS OF COURSES TO BE OFFERED “Bachelor of Technology”

Disclaimer: The undergraduate programme in Bachelor of Technology syllabus & scheme is uploaded as given by the Faculty concerned to the Academic Council. The same has been approved as it is by the Academic Council on 02.07.2018.

Dean faculty of Engineering, Bhabha University

BHABHA UNIVERSITY, BHOPAL

CS-61 Machine Learning

Unit I:-Introduction to machine learning, scope and limitations, regression, probability, statistics and linear algebra for machine learning, convex optimization, data visualization, hypothesis function and testing, data distributions, data preprocessing, data augmentation, normalizing data sets, machine learning models, supervised and unsupervised learning.

Unit II:-Linearity vs non linearity, activation functions like sigmoid, ReLU, etc., weights and bias, loss function, gradient descent, multilayer network, backpropagation, weight initialization, training, testing, unstable gradient problem, auto encoders, batch normalization, dropout, L1 and L2 regularization, momentum, tuning hyper parameters.

Unit III:-Convolutional neural network, flattening, subsampling, padding, stride, convolution layer, pooling layer, loss layer, dense layer, 1x1 convolution, inception network, input channels, transfer learning, one shot learning, dimension reductions, implementation of CNN like tensor flow, keras etc.

Unit IV:-Recurrent neural network, Long short-term memory, gated recurrent unit, translation, beam search and width, Bleu score, attention model, Reinforcement Learning, RL-framework, MDP, Bellman equations, Value Iteration and Policy Iteration, Actor-critic model, Q-learning, SARSA

Unit V:-Support Vector Machines, Bayesian learning, application of machine learning in computer vision, speech processing, natural language processing etc, Case Study: ImageNet Competition

PRACTICAL:

Different problems to be framed to enable students to understand the concept learnt and get hands-on on various tools and software related to the subject. Such assignments are to be framed for ten to twelve lab sessions.

BHABHA UNIVERSITY, BHOPAL

CS-62 Computer Network

UnitI:-Computer Network: Definitions, goals, components, Architecture, Classifications & Types. Layered Architecture: Protocol hierarchy, Design Issues, Interfaces and Services, Connection Oriented & Connectionless Services, Service primitives, Design issues & its functionality. ISO- OSI Reference Model: Principle, Model, Descriptions of various layers and its comparison with TCP/IP. Principles of physical layer: Media, Bandwidth, Data rate and Modulations

UnitII:-DataLinkLayer:Need,ServicesProvided,Framing,FlowControl,Errorcontrol.DataLinkLayer Protocol: Elementary & Sliding Window protocol: 1-bit, Go-Back-N, Selective Repeat, Hybrid ARQ. Protocol verification: Finite State Machine Models & Petri net models. ARP/RARP/GARP

UnitIII:-MAC Sub layer: MAC Addressing, Binary Exponential Back-off (BEB) Algorithm, Distributed Random Access Schemes/Contention Schemes: for Data Services (ALOHA and Slotted- ALOHA), for Local-Area Networks (CSMA, CSMA/CD, CSMA/CA), Collision Free Protocols: BasicBitMap, BRAP, BinaryCountDown, MLMALimitedContentionProtocols: AdaptiveTree Walk, Performance Measuring Metrics. IEEE Standards 802 series & their variant.

UnitIV:-NetworkLayer:Need,ServicesProvided,Designissues,Routingalgorithms:LeastCostRouting algorithm, Dijkstra's algorithm, Bellman-ford algorithm, Hierarchical Routing, Broadcast Routing, Multicast Routing. IP Addresses, Header format, Packet forwarding, Fragmentation and reassembly, ICMP, Comparative study of IPv4 & IPv6

UnitV:-Transport Layer: Design Issues, UDP: Header Format, Per-Segment Checksum, Carrying Unicast/Multicast Real-Time Traffic, TCP: Connection Management, Reliability of Data Transfers, TCP Flow Control, TCP Congestion Control, TCP Header Format, TCP Timer Management. Application Layer: WWW and HTTP, FTP, SSH, Email (SMTP, MIME, IMAP), DNS, Network Management (SNMP).

LIST OF EXPERIMENTS:

- 1) Study of Different Type of LAN & Network Equipment.
- 2) Study and Verification of standard Network topologies i.e. Star, Bus, Ring etc.
- 3) LAN installations and Configurations.
- 4) Write a program to implement various types of error correcting techniques.
- 5) Write a program to Implement various types of framing methods.
- 6) Study of Tool Command Language (TCL).
- 7) Study and Installation of Standard Network Simulator: N.S-2, N.S3, OpNet, QualNet etc.
- 8) Study & Installation of ONE (Opportunistic Network Environment) Simulator for High Mobility Networks.
- 9) Configure 802.11 WLAN.
- 10) Implement & Simulate various types of routing algorithm.

BHABHA UNIVERSITY, BHOPAL

- 11) Study & Simulation of MAC Protocols like Aloha, CSMA, CSMA/CD and CSMA/CA using Standard NetworkSimulators.
- 12) Study of Application layer protocols-DNS, HTTP, HTTPS, FTP andTelNet.

BHABHA UNIVERSITY, BHOPAL

CS-63 Project Management

Unit I:-Conventional SoftwareManagement

Evolution of software economics. Improving software economics: reducing product size, software processes, team effectiveness, automation through software environments. Principles of modern software management.

Unit II:-Software Management Process

Framework, Life cycle phases- inception, elaboration, construction and training phase. Artifacts of the process- the artifact sets, management artifacts, engineering artifacts, pragmatics artifacts. Model based software architectures. Workflows of the process. Checkpoints of the process.

Unit III:-Software Management Disciplines

Iterative process planning. Project organizations and responsibilities. Process automation. Project control and process instrumentation- core metrics, management indicators, life cycle exceptions. Process discriminants.

BHABHA UNIVERSITY, BHOPAL

CS-64 Internet of Things

Unit 1:-Introduction: Definition, Characteristics of IOT, IOT Conceptual framework, IOT Architectural view, Physical design of IOT, Logical design of IOT, Application of IOT.

Unit 2:-Machine-to-machine (M2M), SDN (software defined networking) and NFV(network function virtualization) for IOT, data storage in IOT, IOT Cloud Based Services.

Unit 3:-Design Principles for Web Connectivity: Web Communication Protocols for connected devices, Message Communication Protocols for connected devices, SOAP, REST, HTTP Restful and Web Sockets. Internet Connectivity Principles: Internet Connectivity, Internet based communication, IP addressing in IOT, Media Access control.

Unit 4:-Sensor Technology, Participatory Sensing, Industrial IOT and Automotive IOT, Actuator, Sensor data Communication Protocols, Radio Frequency Identification Technology, Wireless Sensor Network Technology.

Unit 5:-IOT Design methodology: Specification-Requirement, Process, model, service, functional & operational view. IOT Privacy and security solutions, Raspberry Pi & Arduino devices. IOT Case studies: smart city streetlights control & monitoring.

LIST OF EXPERIMENTS:

- 1) Familiarization with Arduino /Raspberry Pi and perform necessary software installation.
- 2) To interface LED/Buzzer with Arduino / Raspberry Pi and write a program to turn ON LED for 1 sec after every 2 seconds.
- 3) To interface Push button/Digital sensor (IR/LDR) with Arduino/Raspberry Pi and write a program to turn ON LED when push button is pressed or at sensor detection.
- 4) To interface DHT11 sensor with Arduino/Raspberry Pi and write a program to print temperature and humidity readings.
- 5) To interface motor using relay with Arduino/Raspberry Pi and write a program to turn ON motor when push button is pressed.
- 6) To interface OLED with Arduino/Raspberry Pi and write a program to print temperature and humidity readings on it.
- 7) To interface Bluetooth with Arduino/Raspberry Pi and write a program to send sensor data to smartphone using Bluetooth.
- 8) To interface Bluetooth with Arduino/Raspberry Pi and write a program to turn LED ON/OFF when '1'/'0' is received from smartphone using Bluetooth.
- 9) To install MySQL database on Raspberry Pi and perform basic SQL queries.
- 10) Write a program on Arduino/Raspberry Pi to publish temperature data to MQTT broker.
- 11) Write a program on Arduino/Raspberry Pi to subscribe to MQTT broker for temperature data and print it.

BHABHA UNIVERSITY, BHOPAL

- 12) Write a program to create TCP server on Arduino/Raspberry Pi and respond with humidity data to TCP client when requested.
- 13) Write a program to create UDP server on Arduino/Raspberry Pi and respond with humidity data to UDP client when requested.

BHABHA UNIVERSITY, BHOPAL

CS-65 Dot Net Lab

UNIT-I:

Introduction .NET framework, features of .Net framework, architecture and component of .Net, elements of .Net.

UNIT-2:

Basic Features of C# Fundamentals, Classes and Objects, Inheritance and Polymorphism, Operator Overloading, Structures. Advanced Features of C# Interfaces, Arrays, Indexers and Collections; Strings and Regular Expressions, Handling Exceptions, Delegates and Events.

UNIT-3:

Installing ASP.NET framework, overview of the ASP.NET framework, overview of CLR, class library, overview of ASP.NET control, understanding HTML controls, study of standard controls, validations controls, rich controls. Windows Forms: All about windows form, MDI form, creating windows applications, adding controls to forms, handling Events, and using various Tools

UNIT-4:

Understanding and handling controls events, ADO.NET- Component object model, ODBC, OLEDB, and SQL connected mode, disconnected mode, dataset, data-reader Database controls: Overview of data access data control, using grid view controls, using details view and frame view controls, ado .net data readers, SQL data source control, object data source control, site map data source.

UNIT-5:

XML: Introducing XML, Structure, and syntax of XML, document type definition (DTD), XML Schema, Document object model, Presenting and Handling XML. xml data source, using navigation controls, introduction of web parts, using java script, Web Services

LIST OF EXPERIMENTS

- 1) Working with call backs and delegates in C#
- 2) Code access security with C#.
- 3) Creating a COM+ component with C#.
- 4) Creating a Windows Service with C#
- 5) Interacting with a Windows Service with C#
- 6) Using Reflection in C#
- 7) Sending Mail and SMTP Mail and C#
- 8) Perform String Manipulation with the String Builder and String Classes and C#:
- 9) Using the System .Net Web Client to Retrieve or Upload Data with C#
- 10) Reading and Writing XML Documents with the XML Text-Reader/-Writer Class and C#
- 11) Working with Page using ASP.Net.
- 12) Working with Forms using ASP.Net
- 13) Data Sources access through ADO.Net,
- 14) Working with Data readers , Transactions
- 15) Creating Web Application.

CS-66 Minor Project II

Objectives of the course Minor Project are:

To provide students with a comprehensive experience for applying the knowledge gained so far by studying various courses.

To develop an inquiring aptitude and build confidence among students by working on solutions of small industrial problems.

To give students an opportunity to do something creative and to assimilate real life work situation in institution.

To adapt students for latest development and to handle independently new situations. To develop good expressions power and presentation abilities in students.

The focus of the Minor Project-II is on preparing a working system or some design or understanding of a complex system using system analysis tools and submit it the same in the form of a write up i.e. detail project report. The student should select some real life problems for their project and maintain proper documentation of different stages of project such as need analysis market analysis, concept evaluation, requirement specification, objectives, work plan, analysis, design, implementation and test plan. Each student is required to prepare a project report and present the same at the final examination with a demonstration of the working system.

In Minor Project-II students have to make project in any of the programming language by using some kind of software and hardware which he/she has learnt in previous semesters. Students can make project individually or in a group with two-three students.

Students should make Project in the topics which will be beneficial to them in future also. Students have to Prepare file of the project which he/she will make.

BHABHA UNIVERSITY, BHOPAL

CS-67 Project Seminar

In Project Seminar students have to make a PPT of the selected topic of Project and present in front of the faculties & students. By doing this, in front of faculties & students, students communication skill will get developed & will be a good presenter. By doing this, students Project knowledge will also get enhanced.
